

**NAME**

make-coordinates-file – convert Radiance file to a JPEG file

**SYNOPSIS**

**make-coordinates-file** *units radiance-file.hdr coordinates-file*

**DESCRIPTION**

Create a coordinates file for use by **devas-visibility**. *units* is one of "meters", "centimeters", "feet", or "inches". *radiance-file.hdr* is a Radiance image file with a VIEW record corresponding to the geometry files used by **devas-visibility**. *coordinates-file* is the coordinates file needed by **devas-visibility**.
