

NAME

make-coordinates-file – convert Radiance file to a JPEG file

SYNOPSIS

make-coordinates-file *units radiance-file.hdr coordinates-file*

DESCRIPTION

Create a coordinates file for use by **deva-visibility**. *units* is one of "meters", "centimeters", "feet", or "inches". *radiance-file.hdr* is a Radiance image file with a VIEW record corresponding to the geometry files used by **deva-visibility**. *coordinates-file* is the coordinates file needed by **deva-visibility**.
